STORK[®] IMM

INJECTION MOULDING MACHINES

**MADE BY SPECIALISTS
FOR SPECIALISTS**

Stork IMM has provided specialized, rapid injection-moulding machines to clients in the plastics industry since 1968. Customers choose Stork machines because they are fast, precise, and backed by outstanding service.

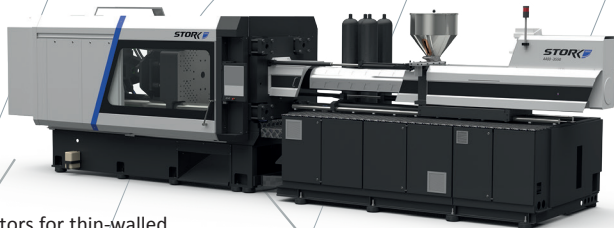

**SERVICE 4.0
PRODUCTS**

We call Stork's digitization and automation components Service 4.0. With packages for optimal performance, efficiency, and energy management, you can choose the technology options right for you. Contact us for your custom plan.

WHAT MAKES IT A STORK?

Robust toggle system for short dry-cycle and reduced energy use

The customizable **Plus-line** features high injection speeds, electrical drives, and 2K units.

Air ejectors for thin-walled parts

Robust rail guidance and massive steel platens

OPTIMIZE PRODUCTION

Using our **smart-tools 4.0** package, automate key features including preloaded stop/start and setup programs for fast setup, automatic shot-weight correction, and optimization of mould cooling.

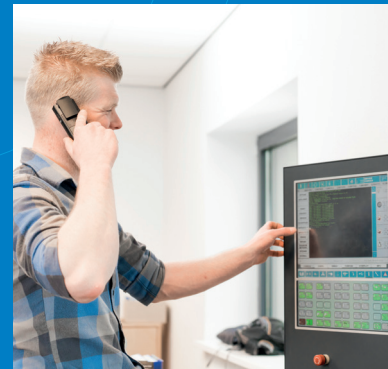

MANAGE ENERGY

Measure energy use in real time with this package that helps you manage equipment settings and control costs.

- Automatically optimize accumulator charging
- Adjust clamping force
- Manage pump control for optimal performance

CONNECT REMOTELY

The enhanced support package provides remote support via IMM connection.

- Live HMI-based chat to access support in real time
- Equipment updates to your smartphone
- Online service portal to communicate and manage case history

AT STORK IT'S ALL ABOUT THE CUSTOMER

Stork represents top quality in injection moulding machines for manufacturing logistic packaging systems. Stork translates our customers passion, craftsmanship, experience and requirements into dedicated solutions. Stork constantly listens to her customers, integrates the insights thus gained into her own expertise and ensures effective implementation in her products. This is a dynamic process. Stork is innovating continuously. It's the very reason why the Stork injection moulding machine will always be the best, fastest and most reliable for manufacturing logistic packaging systems. Of course we apply the same philosophy to our other product lines.

Stork stands for maximum reliability resulting in maximum uptime. This entails supplying high quality injection moulding machines as well as impeccable services. Consequently Stork offers you the highest degree of service, allowing you, in turn, to offer your customers the guarantee of maximum delivery performance. To Stork employees being service-oriented is in their DNA and we expect no less from our suppliers. As a result you as a customer are assured of optimum support chain-wide.

Each and every Stork employee is an ambassador for the craftsmanship we offer you. In our book, craftsmanship extends to the way we listen to customers, give advice, develop, manufacture and provide services. This unique brand of craftsmanship is the pride of everyone working at Stork. We're at your service, day in and day out.
